

Coulwood STEM Academy

Replacement Project

The 2023 general obligation bond referendum presents us with a unique opportunity to enhance the learning environment and educational opportunities for our students. It aims to offer more academic options, alleviate overcrowding, and support safe schools. Here are the highlights of the project that will impact our school communities:

School Board Member District 1

The Coulwood STEM Academy bond project envisions the onsite replacement of the current facility with a modern 54-classroom baseline school, while maintaining the school's integral STEM program. The project aims to create an updated and innovative learning environment that aligns with the emphasis on science, technology, engineering, and mathematics. By integrating advanced infrastructure and facilities, this initiative strives to continue providing students with a high-quality education that fosters crucial STEM skills and prepares them for future challenges at Coulwood STEM Academy.

Estimated Cost:
\$92,706,982
